Oregon Expanded Function Preventive Dental Assistant Pathways II and III

Eligibility Pathways for Expanded Function Preventive Dental Assistants (EFPDA) in Oregon

Performance of expanded preventive functions by dental assistants in Oregon is regulated by the Oregon Board of Dentistry (OBD). The Dental Assisting National Board, Inc. (DANB), on behalf of the OBD, administers the EFPDA certificate program, a service that includes providing information regarding exams and certifications, distributing application materials, administering the required exams, and issuing certificates.

An Oregon EFPDA certificate allows a dental assistant to perform the following function under the indirect supervision of a licensed dentist: Polish the coronal surfaces of teeth with a brush or rubber cup as part of oral prophylaxis to remove stains providing the patient is checked by a dentist or dental hygienist after the procedure is performed, prior to discharge.

An EFPDA may apply pit and fissure sealants under the indirect supervision of a dentist or dental hygienist after successful completion of a CODA-accredited program or other course approved by the Oregon Board, provided the patient is examined before the sealants are placed and the procedure is checked by a dentist or dental hygienist prior to dismissal of the patient.
